

Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain on *Agrobacterium* strain. The figure shows a line graph with the x-axis representing the concentration of the *Agrobacterium* strain (log scale) and the y-axis representing the transformation efficiency (%). The data points are as follows:

Concentration (log scale)	Transformation efficiency (%)
1.0	10
1.5	20
2.0	30
2.5	40
3.0	50
3.5	60
4.0	70
4.5	80
5.0	90
5.5	100
6.0	110
6.5	120
7.0	130
7.5	140
8.0	150
8.5	160
9.0	170
9.5	180
10.0	190

The graph shows a positive correlation between the concentration of the *Agrobacterium* strain and the transformation efficiency. The efficiency increases from 10% at a concentration of 1.0 to 190% at a concentration of 10.0.
